

The AKWE: GO Program

This program is designed for urban at-risk Aboriginal children from the ages of 7-12 years. The program takes a holistic approach and incorporates the four aspects of the medicine wheel (physical, mental, emotional, and spiritual) into the program to promote a healthy and balanced life style.

The goal of the AKWE:GO program is to provide urban Aboriginal children with the support, tools and healthy activities which will build upon and foster their inherent ability to make healthy choices.

This program has been designed based on a fundamental principle: to improve the quality of life of Urban Aboriginal Children through the delivery of culturally appropriate programs and service.
